

# DIDSBURY PIONEER

VOL. XXIX, No. 29

DIDSBURY, ALBERTA, THURSDAY, JULY 21, 1932

\$2.00 per Year. 5 cents a copy

## Evangelistic Services.

BISHOP P. SPRENG, of Naperville, Illinois, who will be the preacher at the evangelistic services to be held at the Zion Evangelical Church from August 1st to 14th. Bishop Spreng is an outstanding pulpit orator and is well known to evangelical audiences throughout the United States and Canada. Didsbury is fortunate to have the opportunity of having him in its midst. The services will be under the auspices of the newly-formed Brotherhood.

## Bridal Shower.

The Ladies' Aid and Missionary Circle entertained at a miscellaneous shower at the home of Mrs. George Liesemer on Wednesday evening in honor of Miss Laura Liesemer, a popular bride-elect of the month. Games were played, and a most wedding followed, in which Emil Hunsperger acted as clergyman and Miss Alice Reunie, bride and Mr. L. Wrigglesworth, bridegroom, to represent the coming bride and groom. A large number of guests were present.

## MAC'S SERVICE HARDWARE

## Safe Breakers

Get \$130.00!

The safe of the Crystal Dairy was broken into Saturday night and the safebreakers got away with about \$130.00.

The robbers first broke into the section house and obtained tools. They then broke into the creamery, carried the small safe into the refrigerator, where they broke it open and got away with the contents.

Constable Jarman, R.C.M.P., of Crossfield, and Constable J. H. Greer, fingerprint expert, of Edmonton, are investigating.

## Wife Found Dead With Throat Cut!

Suspected murder and a suicide attempt shocked the Mayton district, east of Oids on Sunday, when Mrs. David Mettill, 23, was found dead with her throat cut, while the body of her husband was lying beside her in the bedroom, with his throat badly gashed. Gill, aged 24, was believed to have slain his wife and then tried to kill himself. Monday it was reported that Gill's injuries were so serious he was not expected to live.

The deed was committed sometime after 1 o'clock Sunday afternoon. A sister went to the home and was suspicious when she found the car in the garage and all doors locked. She discovered both bodies in the bedroom, with their throats gashed. Mrs. Gill was dead. The sister immediately phoned Constable W. Isobell, R.C.M.P., of Oids, who, with Dr. C. C. Hartman, coroner, went out to the scene of the crime, where investigations were proceeded with.

Mr. Tom Stark, who will be remembered by many oldtimers, has been promoted to be Divisional Sup. of the Alberta Pacific Grain Co., with headquarters at Calgary.

## LOCAL & GENERAL

Miss Laura Smith was a Calgary visitor last week-end.

Mrs. A. Brasso visited the city of the foothills on Tuesday.

Mr. and Mrs. J. W. Halton visited friends in Calgary Saturday.

Mr. and Mrs. A. G. Smith spent the week-end at Banff.

Mrs. Hugel, Nelda and Dorothy are spending their vacation at Sylvan Lake.

Mrs. J. W. Phillipson and daughter Margaret spent a couple of days in Calgary last week-end.

Miss Mary Hughes, Matron of Swift Current Hospital is spending her vacation at her home here.

Mr. Ormond Phillipson returned Sunday from a three weeks' vacation at Winnipeg and other eastern points.

Misses Jean Russell and Helen Tempary spent the week-end visiting relative at Cochrane.

Nick Nowak visited Calgary over the week-end, where he acted as best man at the wedding of his friend, Mr. James Ross.

Mr. and Mrs. W. G. Liesemer and Evelyn returned on Sunday from a two weeks' vacation at Sylvan Lake.

Mr. and Mrs. E. V. Woodcock attended a reunion at the home of Mr. Woodcock's parents in Calgary on Sunday. There were twenty-nine of the Woodcock family present.

Mr. and Mrs. Hugh Lee, Miss Lucille Smith and R. Clemens, and Messrs. C. R. Ford and Milton Ford are on a motor tour at Waterton Lakes.

Mr. and Mrs. J. V. Bambridge, of Vancouver are visiting Mr. and Mrs. F. W. Leeson this week. Mrs. Bambridge is Mr. Leeson's sister. They are on a motor trip and will go from here to Souris, Manitoba.

Local news of your town and district makes the weekly newspaper interesting. If you have visitors or have been visiting, know of any interesting event of social, lodge, club or general nature, phone the Pioneer, No. 12.

Oiler Street Landscape Improvement Board got busy during the week-end and the results leave a very distinguished appearance to the following premises: Battery & Tin Shop, 25 Cent Barber, and the Pioneer Office. It is reported that occupants of other premises will follow the example of the Board.

Henry Wright, Painter, etc., of Didsbury wishes to thank his many friends for their generous support in the draw for his last checkerboard and three groups of birds and butterflies. The winners were: No. 40, Chas. Wrightson, Junr.—Checkerboard; J. Mettill—No. 40, Group No. 2 Birds; No. 10, Johnnie Johnson—Group No. 1 Birds; No. 39, Chas. Wrightson, Senr.—Group Butterflies.

## Softball.

Elkton Win Shirts and Rosebud Win Socks in Berscht Softball Finals.

By blanking Rosebud 13-0, Elkton won the finals of the Berscht Softball Competition last Friday night, and proved worthy of the honor.

The draw for the playoff saw Rosebud playing High School and Elkton versus Clovermount. The game between the students and Rosebud provided the most excitement for the fans, as the score was not so one-sided as the other game. Two runs up in the last half of the ninth the students had two men retired, when Irvin singled safely and after stealing 2nd base home V. Klein's double. Klein scored on Bishop's hit and the ball game was Rosebud's by 5-0.

On the other diamond Elkton was having an easy time with Clovermount, who played much below their usual form. Fred Befus, their pitcher was very erratic, while Alex Befus for Elkton was right "on." Both teams made a number of errors so that it was a listless game to watch. The final score was: Elkton 18, Clovermount 6.

The final game saw Elkton playing a tight ball behind superb pitching by Alex Befus. Only three Rosebud batters got as far as 3rd and in each case Elkton tightened up to retire the side. On the other hand the far west team had no difficulty in scoring Bishop's delivery and garnered 16 hits for 13 runs. The team played like champions throughout and stopped the only real Rosebud threat by a snappy double play in the fourth frame.

The Elkton players will each receive a Forsyth Country Club shirt, donated by J. V. Berscht. Rosebud winning 2nd prize, each player will receive a pair of Holoferm Jockey Socks, also donated by J. V. Berscht.

## Extortion Case Is Withdrawn.

The charge of attempting to extort money with menace was withdrawn against Alex Currie, of Didsbury in the Oids court on Monday. No evidence was offered.

## WEEKLY JOKE

When on his way to evening service the new minister of the village met a rising young business man of the place, in whom he was anxious to interest in his church:

"Good evening, my young friend," he said solemnly, "do you ever attend a place of worship?"

"Yes, indeed sir," every Sunday night," replied the young fellow with a smile, "I'm on my way to see her now."

## Many Entries Promised For Didsbury's Big Fair Wednesday, July 27th

The Didsbury Fair, which will be held next Wednesday, promises to be well up to standard despite the fact that this year the Government is withholding its support.

Previously all the 2nd exhibits have promised to exhibit, and word has been received from both Oids and Cochrane that a large number of livestock exhibits will be brought in from those districts.

The ladies are expected to keep up their department of the fair, and no doubt the inside exhibition will uphold its reputation.

While the general prizes this year will have no money value there is a large list of special prizes which are being donated by the business houses in town, the list being published in last week's "Pioneer."

In the afternoon the attractions on the grounds will comprise a softball tournament, athletic events and children's races. The United Canadian slhots will provide a rubber-clubbing a merry-go-round, side shows and all the usual attractions that go to make the "fun of the fair."

In order to attract as many people as possible the admission to the grounds has been reduced to the nominal charge of 25c for adults and 10c for children from 10 to 15 years. Under 10 years free.

In the evening there will be a senior baseball game on the town diamond.

The Agricultural Society has taken over the Opera House for the evening and will present the talking picture: "This Is The Night," featuring Lily Damita and Charlie Ruggles, also a special "Our Gang" comedy. The show will remain continuous from 6 p.m. to 10 p.m.

The grand finale will be the big dance at 10 15 p.m., when Hopkins' Old Time Orchestra from the radio station CFCN, Calgary, will supply music for both oldtime and modern dancing.

It will be a big day, so be sure to take it in.

A current report that Sir Henry Thornton had tendered his resignation as president of the C.N.R. was declared untrue in official circles on Monday. At the same time it was intimated that Sir Henry's resignation is expected in the not distant future. The resignation, however, verified the report, and the official resignation will date as from August 1st. S. J. Hunsperger, vice-president in charge of operation and construction, C.N.R., was named as acting president.

For the first time in history the Canadian postal dept. has challenged "Old Man Superstition," and has issued a 13-cent stamp for use on registered letters.

## How About A Community Survey?

The more favorable weather conditions prevailing throughout the prairie provinces this year as contrasted with the previous three years, and the more encouraging prospects for an average or even better than average crop this year, have had the result of restoring confidence to hundreds of people who make their homes in purely rural districts and in the towns and villages which exist solely because of the agricultural activities in the districts of which they are the centre. True, there is little ready cash yet available, but here, too, has been the result of the farming community of Western Canada has brighter days ahead. The acute discouragement of 1931 is passing, and people are again thinking and planning for the future.

Now is the time to think and plan. There are many little things to do that will mean much to community betterment, and to the betterment and improvement of the individual farmstead, but which were neglected in former years, frequently on the plea that people were too busy to attend to them. That plea does not hold good at present; people in our towns and villages are not so busy at present that they cannot afford to give some time and effort to community affairs; that is things which call for the giving of some time and effort but which do not call for the expenditure of money, but in the doing of which valuable community assets can be created.

Before we all get so busy with our own affairs again that we feel we "have no time" for matters of general public concern, would it not be a good idea to make a survey of the "home" town or village, or community centre in strictly rural areas, with a view to effecting some improvement? For example, and without limiting the generality of the whole subject, as the law makers say, what is the present state of the school grounds? Have any trees, shrubs or flowers been planted? If so, has cultivation been maintained, or has the work of the past been neglected and the grounds become overgrown with weeds? Is the school an eyesore in the district, the reverse of an inspiration to the children? Perhaps a little paint is needed, or an odd piece of carpentry. If so, why not organize a community "bee" and put matters right and make the school a place of community pride? A little time and effort by all making a small contribution of a few hours will work wonders.

And now about the local cemetery where the pioneers of the community and the loved ones from many a home are sleeping? It reflects the spirit of a community. Is it kept trim, and neat and green, with trees and shrubs keeping off the blustering glare of a hot summer sun, and a few beds of flowers to testify that though friends and loved ones have passed on they are not forgotten? Or is it forever neglected, a tangle of weeds, a place one shies to visit, and so desolate that every time a burial takes place, the sorrow and regret of relatives and friends is increased by the thought that the remains of the dear departed one are left in such a place? Travelling over the prairie many such desolate spots are to be noted. Why not devote a few otherwise idle hours to changing the whole aspect of these sacred spots for the better? Let some public-spirited person organize their community to do the work on a purely voluntary basis.

And that roadside memorial to which in the early years following the war everybody was proud to contribute. It was erected, not as a tribute to war, but as a loving tribute and lasting memorial to those of the community who were the victims of war. If it were merely a memorial to war, it would be well to forget it and let it fall into decay. But it is a memorial to our lost and bravest who made the supreme sacrifice for us. Is that memorial more beautiful today than when first created? Are there trees and shrubs, green lawns and flowers, all about it, and are they kept trimmed and watered and well cared for? Whatever the answer may be, it will likewise indicate the ideals, the sentiments, the public-spiritedness of the community of today.

You reside in the treeless, level prairie country, and it so, has your community sought to transform a small section of prairie into a community park? There is lots of land available, needs and seedlings can be obtained on very little, not infrequently without any outlay of money. All that is required to make a start is the voluntary effort of the public-spirited people of a community, and the contribution of some time and effort by them. And in these days, apart from the pleasure this would bring for your own people, such a little beauty spot in your park will attract your community far and wide. It is by such an enterprise it will be remembered that travellers have long forgotten how many grain elevators or garages your town or village can boast.

Finally, the individual farmstead. Does the house still stand stark and bare on the bald prairie as it did ten or twenty years ago when you first home-landed? Or are you living in one of those spots which are a delight to every traveller along our highways—a farm home surrounded by trees and hedges with a lot of lawn, and a garden, small though it may be? The money cost to effect a truly marvellous change is not large; it means to have the necessary attention and to expend a little time and effort. Yet the dollars and cents value of trees and hedges about the farm home is very great indeed. Try to sell a farm without a trees in competition with one that possesses such an asset and the truth of the statement will be demonstrated.

Many of our western cities, towns, villages and farms, which were hopelessly unattractive places ten and twenty years ago are today places which can boast of much beauty solely as the result of organized and persistent tree, shrub, grass and flower planting campaigns. With the breaking of the drought period of the last few years, now is the time for individuals and communities who have overlooked or neglected the value of such work in the past to begin. Give nature a chance and in the long run she will reward your efforts. Planting, cultivating and watching a grove of trees grow is a cure for pessimism and discouragement; it is a joy in the present and a harbinger of hope for the future.

## Troubled With Her Children Having Summer Complaint

Mrs. J. E. Montgomery, Ave. R, South, Saskatoon, Sask., writes: "I am the mother of two children and have a great deal of trouble with them having summer complaint several times every summer they were subject to it."

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it on hand and use it immediately on the first sign of any bowel complaint."

"Thanks to Dr. Fowler's I no longer dread the summer months."

## Convicts Rescued At Sea

Nine Members Of French Penal Colony At Devil's Island Picked Up By British Boat

Menaced by sharks as they drifted for five days in a waterlogged open boat on the Caribbean Sea, nine survivors of a dash for liberty from the French penal colony of Devil's Island were rescued by the British coast steamer "Tarpon."

The men, after escaping from their island prison, which lies off French Guiana, attempted to reach sanctuary in Venezuela on the northwest. Storms at sea stepped the sail from their frail craft and filled it with water.

They told a dramatic story of the death of a comrade whose last words were "bury me ashore. Don't give me up to the sharks. I shall never see my friends again, but they will see my grave." Lured by the dead body, sharks sped after the boat, but the exhausted felons succeeded in landing on the Pomeroon beach in British territory. There they buried their comrade in a shallow sand grave.

When they put to sea again, a tempest threatened their craft. They waved their shorts as signals, and the "Tarpon" responded as the men were using hope.

Using Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the system which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily exterminated with other refuse from the bowels. Sickness is imparted to the organs and the health of the child steadily improves.

## Trying New System

Vegetables Will Attract Farmers To London Fair This Year

Farmers may say it with vegetables when they arrive at the gates of Western Fair in London, next September. The Fair Board are to consider a suggestion enthusiastically backed up by the relief department that all farmers be admitted in exchange for a load of foodstuffs. To avoid a congestion, a central warehouse is proposed where vegetables will be received weeks in advance and admission tickets issued.

Last winter the city relief department experienced great difficulty in collecting sufficient vegetables, and it is hoped that this system will solve the problem this year. It is estimated sometimes as many as 40,000 farmers attend the fair in a single day.

Persian Balm. The delight of daily femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing. It is delectable to use. Never leaves a vestige of stickiness. Invaluable for hands, face, hair and hair restorative. Wonderfully soothing and protective. Especially recommended in cases of roughness, itching caused by weather conditions.

## Willing To Pay

Consumer Will Give More For Best Quality Produce

There is a contention that the consumer is prepared, usually, to pay a premium for a higher quality, and a more attractively packed farm product. This thought was exemplified lately on the Toronto wholesale markets when the prices of 11-quart baskets of Ontario grown asparagus ranged from \$1.00 to \$1.50. From the ready acceptance of the \$1.50 baskets, it was apparent that buyers were willing to pay the higher price when receiving intimately better quality, and a more attractive pack.

Muscular Rheumatism Subdued. When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Distribution of electric refrigerators in Canada has reached a new high peak. Winnipeg, with its low cost power, is one of the best markets in America for refrigerators and other electrical products.

A new oil well in the southern part of the Turner Valley, Alberta, is reported to have struck a flow of gas estimated at 32,500,000 cubic feet daily.

## Shall Our Monetary

System Be Changed

An Analysis Of Several Of The Proposals Made By Major Strangé

The following in brief, are some of the important proposals that have been made for changes in our monetary system—

(1) That the weight of gold in the Canadian dollar be reduced from 29 grains to about 12 grains.

This would reduce all internal debts, and those owing abroad payable in Canadian currency, by about 50 per cent. It would enable those who borrowed during the war years to repay with commodities and goods approximately the same value as when they borrowed. It would, however, increase the price of all imported foreign goods 100 per cent, or automatically impose an additional 100 per cent. tariff on all imported goods, and commodities imported into Canada. Those who loaned money within the last two years would be repaid about one-half of the value which they loaned. Those who borrowed money or purchased property during the last two years would automatically have the value of their money or property doubled. All those receiving wages or salaries would suffer hardships until readjustments took place because the price of everything they had to buy would quickly rise to double the present value.

Apart, however, from the virtual writing down of all debts by this method, it would put little permanent advantage because the price of all goods offered for sale, and of wages and salaries, would eventually rise by the same percentage as the gold being the dollar was decreased.

(NOTE.—This is simply inflation of currency. France, Germany and other countries after the war tried it but found it practically impossible to put in effect. It seems to be difficult to put in effect. It has started. What individuals or groups are capable of stating where the inflation shall stop? Inflation seems to be in the end to currency becoming practically worthless.)

(2) That the Canadian dollar shall be depreciated in value to the present level of the British pound (i.e. from 20 to about 20 grains of gold) and the dollar shall be tied to the pound sterling.

(NOTE.—This is a mild form of proposal. It would mean that the currency of an independent country like Canada with its own control over its currency, and its own expenditures, could be expected to fluctuate exactly with the British pound, is not stated; in any case would Canadians desire the value of their currency to depend solely upon the action of the British House of Commons and of the British people who do not act upon their own terms?)

(3) That the Canadian dollar shall be increased in value to that of the U.S.A. dollar as quickly as possible and tied to the full gold standard of the U.S.A. dollar, and that by law all debts owing shall be reduced by half and that the Government shall establish the proper relationship of prices for rents—wages—salaries—goods retail and wholesale, of professional services, etc., etc., or in fact, shall revalue by law everything excepting money.

(NOTE.—This is financial and economic dictatorship, pure and simple, and is now actually being tried in Germany. In fact the definition of dollars and cents, and of all things down to the currency value, instead of the inflation of the currency up to the desired price of all else as is proposed in 1 and 2. If a low general price level of commodities continues enough, of course, this state of affairs is automatically gradually brought about for the reason that many debts will not be possible or repayment, and so would be either written down or cancelled by bankruptcy or by private arrangement, and all other prices, wages and salaries eventually would have to decide in a party with commodity prices.)

(4) That by international arrangement all countries should agree to reduce the gold backing of their currency by notes and paper currency by a mutually agreed upon percentage.

This would result in a quick rise in price of all commodities, then the price of all goods, services, wages, salaries, etc., would soon follow and an even balance, in time, would be established. The only real effect of this would be the reduction of all debts, both individual, national and international.

This would allow a greater backing of gold behind notes and currencies than the 40 per cent., which is the maximum amount of gold available for monetary purposes in the world today seems to allow. This larger percentage of backing would consequently diminish the possibility of a country, which whilst drained, might be in danger of being drained of gold, as England was recently.

(NOTE.—The great difficulty of getting many not to agree either with the principle involved or of the amount of the gold reduction, might be almost insurmountable, although this method of controllable international inflation is the most favored of all proposals involving inflation by the "debtors"—the economists—as a means of raising the price level of commodities and of overcoming what

IF YOU CAN'T NURSE BABY YOURSELF... TRY EAGLE BRAND! Countless thousands of healthy, happy babies have been reared on Eagle Brand during the last seventy years. You will find not a little booklet, "Baby Welfare," full of valuable hints on baby care. Write for it. Use coupon below.

**EAGLE BRAND**  
CONDENSED MILK

is probably the major defect of the gold standard.

(5) This proposal is practically the same as No. 4 above, but with the proviso that all gold reserves shall be kept in an international reserve bank at some central point—(Geneva has been suggested)—and that the amount of gold behind the world's paper currency shall be raised or lowered periodically in order that the value of the currency will keep step with the world's gold production and with the production, distribution and consumption of goods and commodities.

(NOTE.—This, of course, would be a form of international managed currency with gold as a basis. This method would be much more difficult to bring into effect and to manage than proposal No. 4, and so would hardly seem to come within the realm of possibility, at least for the present.)

(NOTE.—The gold referred to in this article is pure gold mixed with about one-twelfth alloy in the British sovereign and one-tenth alloy in the U.S.A. dollar, or 113 Troy grains of pure gold in the sovereign and 23 1/4 grains pure gold in the U.S.A. dollar. Or it means that the U.S.A. dollar contains 4.8375, is much gold as the dollar.

(To Be Continued.)

Mexico has just placed export duties on alligator skins.

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Baked, or steamed, fish comes out firm and solid, swimming in its own juice, when you set it up in your Cooker's Kettles. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are equally delicious. Using Canapar you can cook three at once in the same pot over one burner turned low. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pot with Canapar. No overpowering after-ward.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish for your fish, meat, strong, and doesn't spread lin.

Special Offer

CANAPAR is made by the makers of the famous FARMER'S BEEF, Wild Paper in the Green Box. Most grocers, druggists and department stores have Canapar and you can buy it direct from the makers and we'll give you a new and complete book of "Lettters," containing one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd., Montreal, Canada.  
Please send me for which enclosed find one full size and four 1/2 size COOKER'S KETTLES and your 100 recipes for "Lettters".

## Good Progress Being Made In Extraction of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende is now being actively carried on by the Ore Testing Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, Chief of the Division. It is learned that progress is very satisfactory, and remarkable headway has been made considering the nature of the investigation and the small staff available for this work.

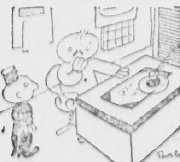

After preliminary investigation of all the known processes, Mr. Timm states, work was confined during February and March to one which seemed to be the most adaptable to the treatment of this particular ore. Now, the investigation has progressed from small laboratory scale work to pilot-plant scale, and some six trial runs have given encouraging results. The pilot-plant scale on which work is being conducted is approximately one-tenth the size of an ordinary commercial unit, calculated to give all the data with respect to operation and costs of a full size unit.

Extractions of radium from the ore have been well over 90 per cent, the last test made giving 97.68 per cent. This, however, is on one type of ore and, as the process is entirely a chemical one, other types may require variations in treatment and may not give such good results. No results, therefore, can be released for publication until all types of ore from the property have been thoroughly tested, and a satisfactory treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing above 40 per cent. uranium oxide. Later, the cobble rejects and low grade ore will, no doubt, be concentrated at the mine to shipping grade, and the treatment plant will be erected in the most favourable position from the standpoint of the cost of chemicals. As it takes three tons of more of acid to the ton of ore, the advantage of shipping the ore to the supply of chemicals will be readily seen.

Least there be any misunderstanding as to the meaning of the word concentration when spoken of in the treatment of pitchblende ore for the extraction of radium, it should be pointed out that the concentration of the radium is distinct from the concentration of the pitchblende in the ore. The latter will, no doubt, be done at the mine when it becomes necessary to carry out this operation. The concentration of the radium is that part of the chemical process in which the radium in solution is precipitated with barium, resulting in a radium-barium sulphate concentrate.

Those unacquainted with the topography and general characteristics of the Great Bear Lake territory, may be interested to know that the lake itself is the largest one contained entirely within Canadian boundaries, and the fourth largest on the North American continent. Its area, according to present surveys, is 11,663 square miles, compared with 31,810 square miles for Lake Superior, 23,010 for Lake Huron, 22,400 for Lake Michigan, and 11,170 for Great Slave Lake. Its greatest length is 108 miles and its width about 110 miles. Its elevation has not yet been accurately measured, but it is approximately 380 feet above mean sea level. Its depth varies up to 75 fathoms or 450 feet, placing its floor below sea level.

Chief: "We have forgotten to stamp the letters."  
Boss: "What idiots we are." Boss Humot, Madrid.

W. N. U. 14-19

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Dease and Simpson, who made this lake their headquarters in the exploration and mapping of the Arctic Coast, but it is only recently that the area surrounding it has become of economic importance. In 1920, oil was discovered on the Mackenzie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. The discovery well, and subsequent wells drilled in 1921 and 1922, were capped and left for development when conditions are economically favourable. The oil has produced, experimentally, a high grade gasoline. In 1923 outcrops of coal were reported to exist at Douglas Bay on Great Bear Lake. From 1926 to 1928 biologists of the Department of the Interior made investigations over a large part of the Northwest Territories in search of grazing lands for reindeer. One of the areas found to be most suitable for the purpose lies immediately north of Great Bear Lake.

### New Source Of Rayon

#### Discovery Regarding Waste From Sugar Cane Is Important

Sugar cane waste has been turned into a new source of rayon—a silky dress material for women. Chemists have succeeded in developing a process by which high-grade cellulose, the base material for rayon, is produced from bagasse, the waste from sugar cane. The discovery is regarded as important as most rayon manufacturers depend upon wood pulp for cellulose. Sugar cane mills accumulate between 250,000 and 500,000 tons of bagasse annually. Much of this material has been used in manufacturing insulating building material. Other quantities have been used as fuel in the mills.

### New Industry In Alberta

#### Factory Turns Out Potato Chips and Potato Wafers

A new industry has been launched in Lethbridge, Alberta, the output of which will be potato chips and potato wafers. The latest models in machinery are used and the prospects are that large quantities of local grown potatoes will find a market. The utmost care is taken in handling the potato chips which will be retailed in attractive, dust-proof containers. In the Lethbridge product proves popular the factory and its products will be extended.

Potato chips are a popular and nutritious food product in the States where similar factories have been established.

### Floral Barometer Is Unique

#### One In Victoria Park, London, Ontario Is Accurate Under Test

A floral barometer has been laid out in Victoria Park, London, Ont., and under test it worked. It is believed to be unique among flower beds of Canada. It records accurately each day the barometric pressure and forecasts change in weather. It has two floral bands, one stationary, and the other moving. The words "dormy," "rain," "change," "air and dry," are on the outer edge in contrasting colored plants. The pressure numbers from 20 to 31, inclusive, are also shown in floral design.

### Elk Island Animal Park

Elk Island National Park, Canada's second largest animal preserve, is within an hour's motor ride of Edmonton, Alberta. The buffalo in Elk Island Park are unusually fine specimens of their kind. The pelage is particularly dark and thick and the animals are all sturdy and well developed. They are not as wild when they were originally captured, but it is inadvisable for visitors to go near them on foot, though they may be approached with safety in an automobile. Both the moose and elk in this sanctuary are also well developed specimens.

492

### FASCINATING PATTERN THAT IS VERSATILE

It does for "Dress-Up" or hardy wear.

Now a dainty pale pink dotted voile inspired the first model. Its darling wee frills with pick-edge and cross-over collar were plain white voile. Its buttons, creating a double-breasted effect, were pink pearl. And can't you imagine it in dainty prints, bistre prints, dotted swiss and pastel crepe de chine?

Shouldn't have called to your consideration of the moment, then you only have to omit the frills. You may find the edges. For instance, you'll find white findings against a blue plique or plain gingham delight. The trim with white pearl buttons.

Style No. 492 is designed for small girls of 2, 4 and 6 years. Size 4 requires 2½ yards of 36-inch material with ½ yard of 20-inch contrasting. Price of pattern 25 cents in stamps or cash coin is preferred. Write care.

### Measuring Star's Brightness

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Department of the Interior, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent. of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

## Riding Mountain National Park, Manitoba's Scenic Playground, Has Attractions For Tourists

### Works In A Circle

#### Great Trouble Is That Unemployment Creates Unemployment

Gross earnings of Canadian railways for March totalled \$25,000,000, as against \$30,900,000 for March of last year. But as operating expenses in March, 1931, were but \$22,500,000, compared with \$27,500,000 in March, 1930, the net position remained unchanged.

Many may ask how the railways could manage to get along in March of this year with \$5,000,000 less of operating expenditure than in March, 1931. They may think that the railways must have been wasting a lot of money last year, or spending it unnecessarily.

The real facts, perhaps unfortunately, are quite different. In March, 1930, the number of railway employees was 145,697, with a payroll of \$19,000,000. In March, 1931, the number of employees had dropped to 124,000, the payroll declining to \$15,000,000.

Thus, while the railways saved a lot in operating costs, it was at the price of 20,000 railwaymen being dropped from employment, with a monthly loss of \$4,000,000 in purchasing power.

That, the circumstances being what they are, helped the railways, but it is a great deal of help to Canadian business. The great trouble about unemployment is that it creates unemployment.—Ottawa Journal.

### Airplane Directed

#### By Train Passengers

#### Successful Experiment Conducted From "Flying Scotsman"

Passengers travelling from London to Glasgow on the crack train, "The Flying Scotsman," at a speed of ninety miles an hour directed by radio-phone the movements of a forty-passenger airliner "Hercules," flying overhead.

Pilot O. B. Jones turned the machine whenever requested, while several of his passengers spoke with persons aboard the train.

This is believed to have been the first two-way conversation between an airplane and a train. An aerial was slung inside the observation car as there was not sufficient clearance on the roof when the train passed under bridges.

### When Time Flies

The advance of age is at first unperceived, but is nevertheless certain and rapid; and when it is realized it seems to approach almost with speed of light, and life at last seems to end soon after its commencement.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,554,000 lbs., Saskatchewan, 1,695,000 lbs., and Manitoba, 1,202,000 lbs. Total 7,351,000 lbs.

## Anglo-American Alliance

A recent wedding of interest to society on both sides of the Atlantic was that of A. F. Stanley-Clarke, of the 11th and 20th Hussars, crack British regiment, and Miss Vivian St. George, prominent New York society belle. The newly-weds are shown as they left St. Mary Abbot's Church, London, England, after the ceremony. The bride is a sister of the well known New York clubman.

On a lofty plateau, 2,200 feet above sea level, which forms the summit of Riding Mountain, covered with a luxuriant growth of forest and set with exquisitely clear lakes, lies Manitoba's great scenic playground, Riding Mountain National Park. Hundreds of elk, bear, and moose roam wild within its boundaries; wildfowl and beaver build their homes along its waterways; while a herd of buffalo, descendants of those wild herds which once roamed the prairies of Manitoba, browse on the rich buffalo grass of its uplands. Here, Manitoba found its park ready made and for years, long before the project of a national park was mooted, it has been the summer playground of people from all parts of the province. Its easy accessibility by rail or highway, and the fact that it lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now, with adequate conservation and orderly development, it is fast becoming for increasing numbers a delightful playground—a place of rest and refreshment.

One of the greatest charms of the park from the scenic point of view is the number of beautiful little lakes which nestle between the ridges, in hollows made by the ancient glaciers of the Ice Age. They are all of sizes ranging from tiny tarns to splendid bodies of water several miles long. The largest and finest of these is Clear Lake situated near the southern boundary of the park. This lovely sheet of water, nine miles long and curving in width from one mile to two and a half miles, reflects in its limpid waters the hues of both earth and sky. A nine-hole golf course is situated at the eastern end of Clear Lake, with a view to the westward down the whole blue length of its expanse.

Clear Lake is largely fed by springs and its cold waters contain several varieties of fish. Northern pike are the most abundant but whitefish and perch are also found in numbers. Fishing is free under the Park regulations. The open season is from July 1 until September 30, and the limit for each angler is fifteen fish a day with a limit of thirty pounds. The tourist seeking fresh woods and pastures new will find that the park fulfils all the requirements of the ideal vacation, for here is a settled summer community with hotel accommodation, stores, and motor camp ground while many summer cottages front on a lake of sparkling blue water. Here, too, are opportunities for fishing, swimming, tennis, and golf, and then just beyond this front an almost virgin land where the elk and bear and moose still roam. Riding Mountain National Park is one of the great natural treasures of old and beautiful nature which have been set aside under the Department of the Interior as national parks for the use and enjoyment of the people of Canada and for the stranger within her gates.

### Quality Increases Sales

An increase of over 2,000,000 lbs. representing some 2,500 head of beef cattle, for the first half year of the present year is indicated in the latest issue of the Live Stock and Meat Trade Review prepared by the Markets Intelligence Bureau of the Dominion Live Stock Branch. Sales for the first four months of 1931 totalled 5,032,250 lbs., while for the corresponding period in 1932 they totalled 7,047,393 lbs.

"My wife is always shrieking with pains."  
"Have you no remedy for it?"  
"Rather! I stop my ears with cotton wool."—Karlakura, Oslo.

## First Twenty-Five, Hardest.

Quarter-Century But a Moment in History—Great Things Wrought.

One of the best cures for pessimism is a little reading of Canada's history in particular. In an Alberta weekly newspaper which is received by The Herald, were found last week the following bits of Alberta history:

"Alberta is only a little over two years old, and twenty-five years is only a moment in the procession of history.

"During that brief time we have increased the sum total of agricultural products from \$20,000,000 in 1906 to \$161,000,000 in 1930, \$175,000,000 in 1931 and \$242,000,000 in 1929.

"Dairy products have increased from \$2,000,000 to \$18,000,000 in the space of 25 years.

"The farmers of Alberta are now cultivating 16,000,000 acres of land, as compared with 1,000,000 acres in 1905.

"Mining products in Alberta have increased in the same space of time from \$1,000,000 to \$16,000,000."

And what is true of Alberta is true, in slightly varying degrees, of the whole of Canada. Our progress has been phenomenal. There have been setbacks, of course, and we are at present experiencing one of them, but, judged by decades, our gains have been enormous.

They will probably be just as great in the next twenty-five or fifty years.

—Exchange.

## Do You Know That---

One of the big arguments of the wet campaign in U.S. is that fully half the tourist trade now going to Canada would be retained in U.S., if that country was wet.

\*\*\*\*\*

Driving an automobile at 60 miles an hour costs three or four times as much as at 40 miles, says the Popular Mechanics Magazine. Experiments showed oil consumption at 50 m.p.h. is 7 times greater than at 35; tire wear at 50 m.p.h. is twice as much as at 40 and gasoline consumption at 55 m.p.h. is one-fourth greater than at 30. For driving on the open road, tests indicated that from 40-45 m.p.h. is the most economical speed.

\*\*\*\*\*

As a contribution to the Five-Year Plan, sheep dogs in Russia are to be shorn for the sake of their wool.

## LOCAL & GENERAL

Ivan Weber, we understand, caught the biggest fish on Sunday.

Tom Roids and George Smiley are camping at Sylvan Lake this week.

Mrs. W. A. Austin, who has been visiting Mrs. D. McRae at Sylvan Lake, returned home on Sunday.

Saturday night dances at the Opera House will be discontinued until further notice.

Millinery Sale: 50 Hats to clear at \$1.00 each. Values to \$5.00 in the lot.—Mrs. Wilson, Main St.

The Sermon of the Lord's Supper will be observed on Sunday at Westcott United Church at 11 a.m.

Mr. Bert Weston spent his holiday at his home at Three Hills, and at Calgary.

Mrs. Owen, of Carstairs, and Mrs. Archie Boyce, of Grand Prairie, were visiting Mrs. J. A. McGhee last week.

Mrs. Jones, of Leduc, is visiting her parents, Mr. and Mrs. Wm. Wilson, of Spruce Lawn farm, and other friends in the district this week.

Rev. F. S. Spiess will be the preacher at the morning service on Sunday at Zion Evangelical Church. Rev. W. W. Krueger, of Regina will preach in the evening.

"Bad Girl," popular novel and play comes to the Opera House screen tonight (Thursday) at 8:30. Children will not be admitted unless accompanied by their parents.

The screen's most funniest pair, Marie Dressler and Polly Moran in "Politics," at the Opera House Monday next for one night only. Just imagine Marie as candidate for mayor, terrorizing the racketeers, and providing more fun than you've had in months.

"This Is The Night" to love, love, and laugh, at the Opera House next Wednesday (Fair night). Funny?—superlatively; romantic?—surely; regressive?—slightly. Come, let's go! Also a popular "Our Gang" comic. Continuous show 6 to 10 p.m. 15c and 30c. Dance after, 50c.

Jim Kirby, Clint Reiber, Tommy Johnson and Jack McCloy had good luck last week-end on their fishing trip in the Clearwater country. It was reported that Jim couldn't fish, but he showed them how when he hooked what was said to be the largest brown trout ever caught in those waters. The fish weighed two and a half pounds. Clint says he saw it first, Jimmy hooked, and it took the other two to land it. It was an exciting moment.

Dress Sale: Voile Dresses \$2.25 to \$2.75. House Dresses 75c. to \$1.95.—Mrs. Wilson, Main Street.

## Correspondence.

The Editor,  
Didsbury Pioneer.  
Dear Sir:

A letter by the Mayor in the July 14th issue of the Pioneer calls for a few comments by the Taxpayers' Research Bureau.

The mayor points out that at the present time especially, the chief deterrent to reduction in taxation is the large amount of arrears of taxes outstanding. In connection with this we wish to draw the attention of the taxpayers of Didsbury to an editorial that appeared in the Calgary Herald of July 11th, which reads in part as follows:

"The latest bulletin issued by the Citizens' Research Bureau of Canada deals with municipal taxation and is therefore of special interest at this time. A comparison is made of the situation in 1930 and 1931, and the conclusion is reached that taxpayers have about reached the limit of ability to pay. Granted the existence of reasonably effective tax collection methods, the bulletin declares, the promptness with which municipal taxes are collected is an indication of the weight of municipal tax burden

in relation to the community's ability to pay. When, in any municipality, uncollected taxes show increases year after year, the municipal governing body should take immediate steps to see how best the tax burden may be decreased."

It is our belief that the people of this town have reached the limit of their ability to pay, and this belief is borne out materially by the mayor's statement that there is a large amount of taxes outstanding.

We believe that it is essential at this time to cut the cost of administration of the town to a point where it will be more in line with business conditions. We maintain that salaries paid to town employees must be reduced, and further, that these reductions be made to all employees equally. Here we wish to point out that it is estimated the cost of living has dropped 29% since 1929.

We are pleased to note the mayor's statement as to the present financial standing of the town, and it is our purpose to try and relieve the taxpayers of some of the burden that has been placed upon them to keep the town in this position.

Yours truly,  
Taxpayers' Research Bureau.

### Farm Women's Week, July 25th-29th, O.S.A.

The Olds School of Agriculture has again arranged an interesting program for Farm Women's Week, July 25th to 29th inclusive.

Those who have attended in previous years have spent a profitable holiday amid pleasant surroundings. General lectures and demonstrations are given each day by members of the staff, and time is provided for rest and recreation.

Those attending live in the school dormitory, where board is provided at \$1.50 per day. There are no fees of any kind and all women are made welcome. Many of those attending represent women's organizations, but anyone is entitled to go even though they do not belong to an organization. A program will be sent on request.

# 500,000 MOTORISTS

## Have Joined the SILVERTOWN SAFETY LEAGUE

Hon. GEO. S. HENRY

ONTARIO PREMIER ENDORSES LEAGUE—"It has been one of my ambitions to promote safety in driving. I am interested in anything which will aid in moulding public opinion to a realization of the importance of sane and careful driving. The idea of the Silvertown Safety League has my hearty endorsement."

Hon. G. S. HARRINGTON

PREMIER OF NOVA SCOTIA COMES OUT FOR SAFETY LEAGUE—"I am interested in anything which will focus attention on the needless sacrifice of human lives due to reckless, thoughtless driving. I heartily endorse the Silvertown Safety League."

Hon. W. R. CLUETT

JOIN SAFETY LEAGUE, RECOMMENDS MANITOBA OFFICIAL—"I urge the co-operation of every motorist," says the Minister of Public Works for the Province of Manitoba, in putting his seal of approval on the Silvertown Safety League."

Hon. S. F. TOLMIE

BRITISH COLUMBIA'S PREMIER URGES SUPPORT—"It should be the aim of every right-thinking citizen to do his part in promoting safety on our highways, and I think that the Silvertown Safety League movement should go a long way toward achieving the desired end."

### Government Leaders call for YOUR Support in Nation-Wide Crusade!

Motor traffic's toll in Canada:

1,300 deaths 45,000 cases of injury 75,000 accidents

This year's toll is mounting rapidly.

IS ANYTHING BEING DONE ABOUT IT? YES!!

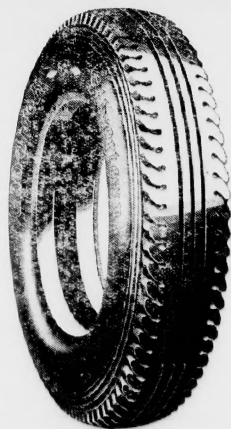

More than 500,000 motorists have already enrolled in the Silvertown Safety League and pledged themselves to abide by the League's "nine commandments of safety".

And government leaders all over the country are asking YOU to join this crusade against the carnage of the roads.

### Take YOUR Stand For Safety

The Goodrich dealer's store in your locality is the local branch office of the League. He has a pledge ready for your signature. And through him you will receive FREE the Silvertown Safety League emblem to display on your car.

Announce to the world that YOU stand for safe driving... join the Silvertown Safety League to-day!

WORLD HAPPENINGS  
BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the Northwest Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately \$3,000,000 during the past decade to run red lights, talk back to motorcycle cops and drive the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterton Lakes National Park as a part of the Waterton-Glacier International Peace Park.

Canada stands third in the public ownership of railways. India is first with 41,724 miles of road. Germany second, with 32,400, and Canada, 24,822, including federal, provincial and municipal.

Atlantic salmon eggs are being exchanged with the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

One hundred years ago, in June, 1832, the Dominion of Canada extended the right of citizenship to the Jews of the country. Jews all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Moonhorn" was bombed by mistake by Chinese aeroplanes sent by General Chan Chai-Tung to recover a quantity of munitions captured by Admiral Chan Chai, rebel commander of the Cantonese navy, but she was not struck.

Union Drilling Company of Calgary will commence drilling for crude oil in the heart of Alberta's "bad lands" where dismaying millions of years ago, Vancouver capital is knocking the venture and W. D. Marler, of Vancouver, is heading the company seeking crude oil.

While screening gravel at the Hudson Bay railway yards at Churchill, George McDonald, machinist, found an old coin of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

## A Perpetual Memorial

Late John Weller Superintended Work On Welland Ship Canal

John Weller is dead, but the Welland Ship Canal will be a perpetual memorial to his work. Few Canadians were familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. Yet it was Mr. Weller who was on the job; it was he who was head of the surveys, designs and carrying out of the big task from 1912 to 1917. When work was resumed in 1918 after the war, it was Mr. Weller who was made consulting engineer. For the last few years he has been in pension from the Federal Government.

There is wide spread interest in the Island Lake district, Manitoba, on the part of mining men in all parts of Canada. Over 800 reports on this district were recently sent out by the Manitoba Chamber of Mines.

## PERSONAL

SCOTCHIE LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies. Has experience in travel abroad and with Canadian girls. Apply Box 59 Winnipeg Newspaper Union, 175 McDermott Ave., East, Winnipeg, Man.

W. N. U. 1949

## Salvaging Lost Gold

Divers Are Bringing Up Ingots From Sunk Ship

Brest, France.—Thirty ingots of gold, valued at \$1,000,000, were stowed away in the hold of the salvage ship "Artiglio II," as divers, with renewed vigor, dropped into the sea to fish up the rest of the \$2,000,000 which went down with the liner "Egypt" ten years ago.

The \$1,000,000 which was clumped down on the "Artiglio's" decks represents four years of dogged labor against the power of the storms and sea. Two stout ships have been lost in the quest and the lives of 15 seamen.

The tragedy of the past was mirrored in the dramatic scenes on the "Artiglio's" deck when the ingots were brought up. There was a moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio I."

Paris, France.—The French salvage company, which first discovered the location of the hull of the liner, "Egypt," from which \$1,000,000 has been recovered by the salvage ship "Artiglio II," will claim part of the booty, Captain Jean Davy said in an interview with Paris-Midi, Paris newspaper.

SLIMMING, GRACEFUL AND YOUTHFUL WITH BECOMINGLY FLAKEY CAPELET

FRILL

Here's a delightful model, full of charm for summery wear.

A expid frill covers the sleeveless arms in a modish manner. And don't you think the skirt is smart with its slimming bias lines?

To make it cut out and you'll finish it in less time than it would take to shop for one that is as smart as this model.

It is carried out in triple sheer print.

Tab skirts in white or pastel, voile prints, sheer dotted batiste and sheer linen prints are dainty and cool suggestions.

Style No. 519 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 2 1/2 yards of French material.

Price of pattern 25 cents in stamps or cash (cash is preferred). Wrap coin carefully.

## Contract Bridge

By Hamilton B. Hatch, Cavanish Club, Toronto

In my previous article the methods of valuing the trick taking probabilities of hands were given. Today I will deal with the application of these principles.

It must be understood that in Contract it is the endeavor of the partnership in any particular deal, to tell as precisely and as definitely as possible the story of the twenty-six cards held by the partnership. For this reason, certain basic conventions are necessary and also certain definite formulae for card evaluations. Both of these have been outlined in previous articles.

The opening bidder, under ordinary circumstances, opens the bidding when his hand contains three or four high honor cards which, he thinks, under average conditions, will take from two to three tricks in any declaration the adversaries may make. Also the opening bidder guarantees, that, in case he and his partner are the declarers the bidding hand will take as a minimum, from four to five tricks if the deal is played in the original declaration made. That therefore there are nine tricks left for the three remaining hands, and that the opening bidder expects his partner to have at least three of these.

There fore when an opening bid of one is made normal expectancy by the opening bidder is three taking tricks in the declared suit in his partner's hand. These three taking tricks are made up of the three kinds of tricks. High card tricks, long suit tricks and ruffing tricks.

It must be borne in mind that, in Contract, provided there is no interference bidding, the first response by the partner of the original bidder is the vital response. In other words it is upon the first response that the success or non-success of that particular deal depends. It is, therefore, of the utmost importance that this first response be precise. In any raise by partner of the original bidder's declaration, the raise must be given in full. As normal expectancy is three taking tricks, the full raise is the number of tricks above three that the hand contains. This works out as follows:—The original bid is one spade. This bid definitely informs the partnership that the bidding hand contains a minimum of from four to five taking tricks with spades trumps. The original bidder's partner decides that the spade bid fits his hand and that the deal should be played with spades trumps. The responding hand then figures the actual trick taking probabilities of the hand with spades trumps. If the hand will take four tricks, then he raises the bid to two spades. If the hand will take five tricks he bids three spades and so on. In other words he gives raises corresponding to the number of taking tricks he has above three. The following example will explain this.

North  
Spades J. X. X. X  
Hearts X. X  
Diamonds A. K. X  
Clubs K. X. X. X

West  
Spades X. X. X  
Hearts J. X. X. X  
Diamonds J. X. X  
Clubs Q. X. X. X

East  
Spades Q. X. X  
Hearts K. Q. X. X  
Diamonds Q. X. X  
Clubs A. J. X.

South  
Spades A. K. X. X

North  
Hearts A. X. X. X  
Diamonds X. X  
Clubs X. X. X. X

The Bidding.—South is the Opening Bidder.

8 W N E  
1 Spade Pass 3 Pass Pass  
4 Spades Pass Pass Pass

In valuing North's hand the procedure is as follows:—

Half a trick for the four card spade suit.

Half a trick for the Jack of Spades.

One trick for the ability to ruff the third round of hearts.

Two tricks for the Ace, King of Diamonds.

Half a trick for the four card club suit.

Half a trick for the King of Clubs.

Or a total of five taking tricks with

## FOR SALE

TAKEMURA BROS.  
P.O. BOX 181 S. SALMON ARM, B.C.

Spades trumps. Normal expectancy is the trick. Therefore North has two raises and bids three spades.

South's hand is valued as follows:—  
Two tricks for the Ace, King of Spades.

Two tricks for the five card spade suit.

One trick for the Ace of Hearts. Or a total of five taking tricks. As North has shown five taking tricks, As South has five, then North bids four spades, as the bidding has disclosed ten taking tricks in the combined hands.

The valuations which I gave you in a previous article are uncanny in their accuracy up to ten tricks. In the next article it will be shown under what circumstances they are not accurate and why. It may be said however that eighty per cent of the time by are accurate.

## Body Emits Violet Rays

Rays From Woman's Eye Destroys Yeast Cells

A woman's eye killed yeast cells simply by looking at them, Cornell University recently. This discovery, suggesting the "evil eye," but found due to an ordinarily harmless form of ultra violet rays given off by human bodies generally was reported to the American Association for the advancement of science.

The experiments were described by Dr. Otto Rahn, of the Cornell Bacteriology Department.

The yeast cells—each a tiny particle—were laid on a glass slide. The woman placed her eye close, as in looking through a microscope. The cells died in a few minutes. Previous experiments with other parts of the body explain the lethal power of this feminine look.

For several years scientists have been reporting various discoveries that living things produce ultra violet rays. In the human body they were first found coming from working muscles, though not from resting ones. Then they were found in the blood and in carcinoma, a form of cancer.

The finger tip rays of several persons at Cornell killed yeast readily. Through quartz placed above the cells, the killing required about 35 minutes; without it two to five minutes. The quartz helped to show that ultra violet was the cause. Yeast protected by ordinary glass which is impervious to ultra violet was unharmed.

After the finger, the tip of the nose was discovered to be a fine ultra violet "tube." Then came the eye.

The human rays are not always harmful. From some persons they are beneficial to tiny plants. There seems to be no difference in the kind but the volume differs. When large it is lethal at a yard. The same person emits it at different rates. He may be "killing" at one period and "benign" at another.

## More Prevalent In Cities

Common Cold Flashes Best In Crowded Centres

That colds are associated with crowded cities public health officials have long suspected. Dr. Wilson G. Smittle of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only from outsiders. Spitzbergen's case is especially impressive. The miners of that most northerly community live and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smittle considers that the common cold must be attributed to an infection and probably to one that can never be seen under the microscope we naturally ask if there is no germ that will impart immunity. He holds out no hope. Only the secondary infections may perhaps be thus controlled. The primary cold seems to be un conquerable—the price we pay for swarming in cities.

Mrs. Adam Ate Apple—It wasn't Eve who ate the Biblical apple in the Garden of Eden. It was Mrs. Adam. Dr. H. A. Ironside, Chicago, explained in a lecture at Fort Worth, Texas. The name Eve was conferred on her later, by Adam himself.

The active search for oil in western Canada has switched to Northern Alberta, where three test wells are planned in the Athabasca area, by Eastern Interiors.

## What Price Accidents

Border Of Cost Falls On Just and Unjust Alike

The average citizen when he picks up the paper and reads about an automobile accident, may feel a fleeting moment of sympathy for the victim, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. Nearly every accident calls for emergency hospitalization and this in its turn costs money.

To this cost must be added the expense of automatic signals, court and traffic judges. Insurance rates also increase. So that any way one figures the matter out the burden of such accidents falls upon the just and the unjust alike.

In the year 1931 there were some 3,000,000 automobile accidents in the United States, with 1,000,000 people killed or injured. This is too appalling to even comment upon. The destruction of life and property in the end touches everybody's pocketbook more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile hazard.

The remedy lies solely with the people themselves.—Argonaut, San Francisco.

## Good Citizenship Medal

Mrs. James Macaulay Is Honored By Native Sons Of British Columbia

Mrs. James Macaulay has been declared Vancouver's "good citizen" this year by the award of the good citizenship medal of the Native Sons of British Columbia. She came to Vancouver in 1880 and since then has been associated with many national and civic organizations.

In association with the late Mrs. D. Gavin of Vancouver, Mrs. Macaulay initiated action which resulted in establishment of the Victorian Order of Nurses of Canada, establishment of the nucleus of the present Vancouver General Hospital.

As honorary president of the Royal Needlework Guild, Mrs. Macaulay was honored when Her Excellency Lady Willington presented to her, on behalf of Her Majesty Queen Mary, a gift and a letter of appreciation for her services in connection with this work.

Other activities of this year's "good citizen" covered a very wide range.

## Forest Conservation

Barnjum Forest Foundation To Carry On Good Work

Frank J. D. Barnjum of Montreal, Annapolis Royal, N.S., and Victoria, is forming a corporation named the "Barnjum Forest Foundation," to perpetuate and carry on the forest conservation campaign and "save the big trees" movement inaugurated by him. He has enlisted the support of his family, together with the funds which he allotted to them in 1929, when he retired from business and divided his fortune between his family and his forest conservation campaign fund.

## Owes Origin To Rivalry

Parchment Was Evoked Through Jealousy Between Ancient Kings

It was the rivalry between two ancient kings which led to the invention of parchment. Ptolemy Philadelphus forbade the export of papyrus reed from Egypt to King Eumenes of Pergamum, because he jealously felt that Eumenes might build up a library greater than his own.

It therefore became necessary for Eumenes to search for a substitute, and he ordered the skins of sheep to be dressed in such a way that they could be written upon.

## "YES, I AM 40 YEARS OLD!"

says Irene Rich

"YES, I am 40 years old. I don't mind confessing it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know."

But, in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—606 of the 694 important ones! "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Surely you will want to try this fragrant, white soap. The caress of dollar-a-cake French soap for 10c.

IRENE RICH and her two daughters (left to right) Irene, twenty-one years old, Joan (in background), fifteen, and their mother, actually all "fifty." One of them Rich recent photographs.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET PEDLER

Author of  
"The Splendid Folly," "The Hermit  
Of Far East,"  
Hodder & Stoughton, Ltd., London.

CHAPTER XXIV.—Continued.

Once more the curtain had fallen, and, to the hum of conversation suddenly released, the lights flashed up into being again over the auditorium. Simultaneously the door of Lady Anne's box was opened from the corridor outside.

"May I come in?" said a voice—a pleasant voice with a gay infection of laughter running through it as though its owner were quite sure of his welcome—and Burke, bold and striking-looking in his immaculate evening kit, his rosy hair flaming wickedly under the electric lights, strode into the box.

He shook hands all round, his glance slightly quizzical as it met Jean's, and then Lady Anne presented him to the Countess de Varigny.

It almost seemed as though something, some mutual recognition of a kindred spirit, flashed from the warm southern-dark eyes to the fiery brown ones, and when, a minute or two later, Burke established himself in the seat next to Jean, vacated by Nick, he murmured in a low tone:—

"Where did you find that Eastern-looking character? I feel convinced I could lose my heart to her without any effort."

Jean could hardly refrain from smiling. This was her first meeting with Burke since the occasion of the scene which had occurred between them in the little parlour at the "honeymooners' inn," and now he met her in the world, other than of a mutually pleasing and amicable nature, had

taken place. It was so exactly like Burke, she reflected helplessly.

"Then you had better go and make love to her," she suggested. "There happens to be a husband in the background—a little hypochondriac with quite charming manners—but I don't suppose you would consider that any obstacle."

"None," retorted Burke placidly. "I'm quite certain she can't be in love with him. Her taste would be more—robust, I should say. Where is she stopping?"

"At Claridge's. We met her there this evening. I knew her in Switzerland."

"Well, you shall all come out to supper with me tomorrow—the Countess included."

Jean shook her head demurely. "We shall all be back at Staple tomorrow—the Countess excepted. You can take her."

"Then the supper must be tonight," replied Burke serenely.

"What are you doing in town, anyway?" asked Jean. "Is Judith with you?"

"No. Came up to see my tailor"—laconically.

He crossed the box to arrange matters with Lady Anne, and before the curtain rose on the last act it was settled that they should all have supper together after the play.

Later, when Burke had once more resumed his seat next Jean, Madame de Varigny, whose hearing, like her other senses, was preternaturally acute, caught a whispered plaint breathed into Nick's ear by Lady Anne.

"Now isn't that provoking, Nick saying? Why on earth need Geoffrey Burke have turned up in town on our last evening? I was hoping, later on—if you and I were very discreet and effaced ourselves—that Blaise and Jean might settle things."

Madame de Varigny's eyes remained fixed upon the stage. "There was no change in their expression to indicate that Lady Anne's plaintive murmur had at that moment supplied her with the key of the whole situation as it lay between Jean and the two men who were sitting one each side of her."

But the following evening, when the Staple party having left town, she and Burke were dining alone together at a little restaurant in Soho, the knowledge she had gleaned here fruit.

Burke never quite knew what impulse it was that had prompted him, as he made his farewells after the supper-party, to murmur in Madame de Varigny's ear, "Dine with me to-morrow night." It was as though the dark mysterious eyes had spoken to him, compelling him to some sort of friendly overture which the shortness of his acquaintance with their owner would not normally have inspired.

It was not until the coffee and cigarette stage of the little dinner had been reached that Madame de Varigny suddenly shot her dart.

"So you come all the way up from this place, Combe—Combe Elvie?—to see Miss Peterson, and hey, presto! She vanishes the next morning!"

Burke stared at her almost rudely. The woman's perplexity annoyed him.

"I came up to see my tailor," he replied curtly.

"Mais parfaitement!" she laughed—low, melodious laughter, tinged with a frank friendliness of amusement which somehow smoothed away Burke's annoyance at her shrewd summing up of the situation. "To see your tailor, 'Naturelement!' But you were not sorry to encounter Miss Peterson also, hem? You enjoyed that?"

Burke's eyes gleamed at her.

"Do you think a dog enjoys looking at the bone that's out of reach?" he said bluntly.

"And is Miss Peterson, then, out of your reach? Me, I do not think so."

Burke was moved to sudden candour.

"She might not be, if it were not that there is another man—"

"Ce Monsieur Tor-ma-rin?"

"Yes, confound him!"

"We'll"—with a long-drawn infection compact of gentle irony. "You should be able to win against this Monsieur Tor-ma-rin. I think you will win."

Burke shook his head gloomily. "He had first innings. He met her abroad somewhere—rescued her in the snow or something. That rescuing

## You said it! it pays to "ROLL YOUR OWN" with..

stunt always pays with a woman. All I did!—with a short, harsh laugh—was nearly to break her neck for her out driving with me one day recently!"

"Is she engaged to Monsieur Tor-marin?" asked Madame de Varigny quickly.

"No. Luckily, there's some old affair in the past holds him back."

She nodded.

"You shall marry her," she declared with conviction. "See, Monsieur Elvie—"ale, ale, quel nom!" I am "clairvoyante, propheteuse," and I tell you that you need marry his little brown Jean."

Her foreign accent strengthened with her increasing emphasis.

Burke looked dubious.

"I'm afraid your clairvoyance will fail this journey, madame. She'll probably marry Tor-marin—unless," his eyes glinting, "I carry her off by force."

Madame de Varigny shook her head emphatically.

"But no! I do not see it like that."

"Et bien!" If she becomes fiancee—engaged to him—you shall come to me, and I will tell you how to make sure that she shall not marry him."

"Tell me now."

"Nun, non! Win her your own way. Only if you do not succeed, if Monsieur Tor-marin wins her—why, then, come to visit me at Chateau Varigny."

That night a letter written in the Countess de Varigny's flowing French handwriting sped on its way to France.

"Matters work towards completion," it ran. "My visit here has changed 'Bien a propos.' There is another would-be lover besides Blaise Tor-marin. I have urged him on to win her if he can, for if I have not wrongly estimated Monsieur Tor-marin—"

in—and I do not think I have—he is of the type to become deeply in love and less able to master his feelings if he realizes that he has a rival. At present he refrains from declaring himself. The opposition of a rival will probably drive him into a declaration very speedily. When the dog sees the bone about to be taken from him—he snaps! So I encourage this red-headed lion of a man, Monsieur Burke, to pursue his "affaires du coeur" with vigor. For if Blaise Tor-marin becomes actually betrothed to Mademoiselle Peterson, it will make his punishment the more complete. I pray the God of Justice that it may not now be long delayed!"

(To Be Continued.)

## Rich Gold Strike

Two Prospectors Find Wealth In Nuka Bay, Alaska

Reports of a fresh gold strike in the Nuka Bay district, 60 miles southwest of Seward, Alaska, were brought in by two prospectors who displayed a fifteen-pound sample of gold quartz estimated to assay \$50,000 a ton.

The strike was made by Dave Downey and Tom Babcock, and the specimen was declared by veteran prospectors to be the richest ever taken from the district.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugist's.

## Not a Bad Definition

Robert Quillen in his private newspaper which he publishes "for his own amusement and the entertainment of his friends" defines "Radio" thus: his friends' defines "Radio" thus: "An expensive instrument you place in your home so some ass can talk to you about toothpaste!"

In Saskatchewan, south of approximately latitude 53, enough food is produced to support a population of 40,000,000.

## Little Helps For This Week

"It is God that girdeth me with strength, and maketh my way perfect."—Psalms xviii, 32.

Even as a nurse, whose child's imperfect pace

Can hardly lead his foot from place to place

Leaves her fond kissing, sets him down to go,

Nor does uphold him for a step or two;

But when she finds that he begins to stand,

She holds him up and kisses him withal;

So God from man sometimes with-draws His hand

Awhile to teach His infant faith to stand.

But when He sees his feeble strength begin

To fail, He gently takes him up again.—Quarles.

When the babe puts his little soft hand into yours, his hand is as strong as yours, since it is yours that guides it; so, when we put our hand into God's, we are by His grace as strong as He, since He leads, and we only follow.—Henry Ward Beecher.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swelling, contraction of cords, stiffness of joints, and sore muscles.

Forecast Big Crop

The Lethbridge Herald says the forecasters are already putting the Alberta wheat crop this year at 150,000,000. It's a long way to August 20, when cutting may be expected to commence, and many things may happen. However, if the price outlook were as bright as the yield prospects we would all be happy.

A \$250,000 hotel is being built at Edmonton, Alberta.

## Women's Institute District Conference

The West Didsbury Constituency Conference of the Women's Institutes in the district was held in the Knox United Church, Didsbury, Wednesday last, with 87 visitors and members registered. After the singing of "O, Canada," "Alberta," and the repeating of the Creed, Mrs. James Hoesgood opened the conference with a message of cheer and encouragement: "Carry On for Home and Country."

Mrs. J. Hughes, acting secretary, in the absence of Mrs. J. Robertson, read the report of the 1931 conference. The financial report showed a balance of \$55.77. It was voted that the constituency fees remain at 30c. per member. A recommendation is to go forward that the district convention meets on years alternating with the provincial convention.

Mrs. R. MacFarlane replied to the address of welcome given by Mrs. Pearson. Secretaries of Westcott, Rugby, Cremona, Mountain View, Lone Pine, Siebertville, Carstairs, all reported favorable progress and interesting meetings.

Mrs. Boyce, Carstairs, convener of Home Economics, gave her report, noting an exhibit of home-made articles. Following this, Mrs. Ferguson informed the meeting of a handicraft exhibit to be held at the 1933 provincial convention. The meeting then adjourned for dinner.

The afternoon session opened with a song, after which the following reports were given: Mrs. MacFarlane, Convener of Agriculture; Mrs. Reed, Canadian Industries; Mrs. Wahl, Child Welfare; Mrs. Ure, Education; Mrs. Hogg, Canadianization and Immigration; Mrs. A. Robertson, Junior Legislation; Mrs. R. Webster, League of Nations.

Here followed an inspiring and instructive talk by Mrs. Ferguson, district convener. She thanked the institutes for their splendid response to the request for funds, and for financial aid to the provincial fund. She urged the members to create interest in their meetings by having something to see, to hear, to do and to eat. Let the members live up to their institute motto, "For Home and Country" by working for their homes; by taking an active interest in public offices, the administration of justice, sports, the press, education of youth.

Mrs. Ure, convener of Education and Better Schools, reported great interest in the Carstairs oratorical contest, and urged all institutes to encourage this work in their own districts. It was moved that this matter be discussed in the various districts before taking further action.

The following motions were put to the meeting: That each institute appoint its delegate to the district conference, at its annual meeting; the delegate to be responsible for part of the program. That secretaries send forward conveners' reports. That "Red River Valley" be learned and sung at meetings.

Two cars collided head-on south of Bowden recently, when a car driven by Cameron Love, 19, met an auto driven by Ray Fagan, 21. Miss Emily Fagan and Glen Fagan, passengers in Cameron's car were both badly cut, Miss Fagan being scratched and bruised and Glen Fagan narrowly escaping serious injuries when gashed around the angular vein. E. Rhano was also a passenger in Cameron's car.

## LOCAL & GENERAL

Misses Holly, Lottie and Grace Hunsperger, Aileen St. Clair and Jessie Monroe are vacationing at the Durrer Cottage, Sylvan Lake.

Mr. and Mrs. A. G. Studer returned Sunday from a vacation at Sylvan Lake.

Pete Miquelon, of the local C.P.R. depot is relieving at Stephen, B.C. and J. A. Grove, of Edmonton is assistant agent here for the present.

Mrs. W. S. Durrer and daughters returned home from Sylvan Lake on Sunday, after having spent a couple of weeks at their summer cottage.

Mrs. W. G. Evans, and sons Elmer, Howard, Fred and Arthur are spending their holidays at Sylvan Lake.

Mr. and Mrs. Ben Olson, of San Pedro, California, were calling on old friends here last week. Ben was formerly local manager of the local government telephones here.

### Burnside Notes.

Mr. Harold Metz arrived home on Saturday from a Peace River trip.

Mrs. Joe Clark visited Mrs. A. E. Thompson last Wednesday.

Mr. Ralph Long was a Monday visitor at Mr. H. A. Pearson's.

Miss Bertie Metz has been spending week with Calgary friends.

Dennis Jenkins is assisting Mr. Hugh McLean with his buying.

Miss Lydia Bittner has been visiting Miss Helen Pross.

Bruce Shields spent several days last week with Carmangay friends.

Miss Marie Siddon spent a few days last week with Miss Sadie McLean.

Miss Winnie Spragg and Mr. Otto Bittner spent Saturday evening with Captain and Mrs. Page.

Ralph Honey and Freddy Doll, of Didsbury, spent the week-end with Noah Eckel, and played in the horseshoe tournament.

Miss Zoak, of Sunnyslope, and her assistant, Miss Stauffer, are conducting camp meetings in Lone Pine Hall every evening this week.

A number of neighbors and friends of Mr. Percy Saunders gathered at his new house Saturday night and tripped the light fantastic until midnight.

Mr. Spencer, United Church student is camping this week at Keiver Lake, with about twenty-five boys from Community Hall, Lone Pine and Allingham.

Mr. and Mrs. Noble Heaton, of Acme, Mr. and Mrs. Ralph Heaton, of Spokane, and Mrs. Heaton, Senr. spent Sunday with Mr. and Mrs. A. E. Thompson.

### Mountain View Notes

The regular meeting of Mountain View W.I. will be held on Thursday as usual.

Mr. and Mrs. H. Sargeant and Mr. and Mrs. B. Sargeant were visitors in the district on Sunday.

Mr. H. Roberts has completed the repairing of the chimney at Grand Centre school, which was struck by lightning.

The annual W.I. Constituency Conference met in Didsbury last Wednesday. Many members of the local branch attended and a very instructive and social time was spent.

Among those who motored to Calgary last week were: Mr. and Mrs. Ellis Barnes and family; Mr. and Mrs. Ed. Barnes; Mr. Spencer; Mr. and Mrs. Findley; Mr. and Mrs. Mullen; Mr. and Mrs. B. A. Atkinson; Mr. E. Atkinson.

A successful picnic was held at Community Hall on Wednesday, July 6th, when several baseball games were staged. The ice cream booth proved a popular attraction, the delicious delicacy being home-made this year. The dance that followed in the evening was well attended. The W.I. wish to thank all those who made the affair a success.
